

It's a perfect storm for you!

I usually reserve this kind of email for my affiliates, but decided to include everyone on today's message because it's such a great opportunity...

We've all seen the headlines continue to rack-up over the past few months about the horrendous state of the economy.

Just browse through the news today and you'll find the following...

“Inflation survival guide”
“Crude rises in volatile trading”
“Oil speculation in House crosshairs”
“Cite midway through 6,500 job cuts”
“Gas prices up a dime in two weeks”
“Stagflation still threatens US economy”
“Wall Street braces for more layoffs”
“Britain sounds the alarm on inflation”

Makes you want to hide your head under a rock doesn't it!?

Well there's a silver lining to every cloud, and new opportunity with every pink-slip... It just depends on how you look at things.

Obviously people are looking to do two things right now... Save money, or make more of it.

It's no big secret that in order to get a top search engine ranking, you need other websites to link to your website. And depending on what keywords you're trying to rank well for, you may need hundreds, to thousands of links to crack the top 10 in the major search engine (Google, Yahoo, and MSN).

For example, the #1 ranked website on Google for the search term "web hosting" has well over 15 million websites linking to them!

That's right... I said 15 million other websites! I know what you're thinking. "Web hosting" is a very competitive search term. I wouldn't need that many links to get a top ranking... And you're right. You wouldn't. In most cases, you could get a top ranking with as little as a few hundreds links.

But... what I can tell you is that if you have zero websites linking to you, you will have zero ranking in the search engines. So, how do you get around this? Easy, you find as many websites to exchange links with as possible, or your site can be added to my [Veretekk Platinum linking system](#) and create thousands of links over night.

The more websites you can get to link to your website, the higher you will rank in the search engines, guaranteed!

These top ranked websites know this and they will do any and everything humanly possible to get other websites to link to them. Because a higher ranking means a BIGGER pay day!

Why doesn't everyone and their brother trade links if it gets you top rankings?

The answer is simple. It takes an awful lot of time and work to manually exchange links with other websites. Even if you're using the Link Metro directory. That's why subscribing to my system just makes sense. For more information please respond to me at this email address [Click Here](#)

Until next time,
